

Hi Footyweb Stakeholders,

**The following fixes and developments have gone live this week.**

1. School and School Grade fields were showing twice in the field configuration section of the database - this has now been fixed and is only showing once.
2. Live Score Play by Play not updating on the fixtures and results website correctly. Some users experienced issues where the live score was not updating constantly (only at half time and full time). This is now fixed so live score will update constantly on the relevant websites.
3. Member Type field on the first page of the registration form is now compulsory. A participant will have to select one (or more before clicking through to the next form). This will stop participants registering into the season without a member type which stops them being added to the team sheet.
4. The Payment Model for all Leagues and Clubs has now been changed to inclusive. No more user pays option for Leagues and Clubs as per previous communications sent out on the 6th October
5. Participants can now register into the 2015 season as the seasons have been rolled over.
6. If the League is apart of the National Registration System then all linked forms have been unlinked and deleted. This means that any clubs/league that have the linked forms URL on their website will need to change the URL. This is because the linked form URL is different to the National Registration Form URL.

**Things that are close to being released.**

1. Registration widget - due to the National Registration form all using the same id number 36056 we have had to re-work the current registration widget that some clubs/league use to promote registration.
2. Validation check when auskick members register in to a community football club. This will stop duplicates being created when auskick members register through the National Registration Form as New Participant (as they should).

Let me know if you have any questions and enjoy the weekend.

Regards
