

Hi Footyweb stakeholders

What went live this week...

1. The Registration widget that clubs and leagues can put on their FOX SPORTS PULSE websites can now handle the National Registration Form. There is an article on our support site on how to do this <https://sportingpulse.zendesk.com/entries/45993350-Website-URL-for-AFL-Registration-NRS-Widget>
2. Clubs, Leagues, Regions and States are now able to add messages on to the National Registration form (in the messages section of the 'Edit' registration form area). Previously you could only add to the terms and condition section of the registration form - now you can added messages to all parts of the form.
3. Double up of products when participants use the back button on the registration form. Previously if a participant clicked on the back button during the registration process there was a chance that the product they selected would double up. This has now been fixed so a person can click on the back button to change details and not get a product showing up twice.
4. Auskick Validation improvement. Auskick participants who have not registered to a community football club before will use the 'I am registering for the first time' option on the National Registration Form. Clubs and Leagues will no longer be able to Transfer a Member from Auskick. When the Auskick participant/parent enters in their First Name, Family Name and Date of Birth the system will run a check in the back end and bring up that participant. They will then confirm that is them and move through the registration form. Once they complete the registration form the player will show in the pending registration area awaiting approval. Once approved all player details and history will be moved across from Auskick to Footyweb. Here is the support article that goes with this change <https://sportingpulse.zendesk.com/entries/59170980-Registrations-Auskick-player-registering-to-a-club>

Hope everyone has had a good week.

Regards

Paul Stewart
